## FOREWORD

- Why bother with another personality test? In a 2012 article, the Washington Post estimated that since 1962, more than 50 million people have taken the Myers-Briggs personality test (commonly known as the MBTI). Organizations of all sizes use the MBTI test, from Fortune 500 companies to the U.S. State Department. The test, and the model it is based upon, have become an international phenomenon. But not without its apparent downsides.
- The MBTI test, despite being based on Carl Jung's model proposed in his 1923 book "Psychological Types," has a severe flaw: *low reliability*.
- If you take the test multiple times, you have a 50% chance to fall into a different category than you did previously. This alters all the proposed insights the test may have offered you (or your prospective employer) on the previous attempt.
- This flaw comes from trying to place people into binary buckets based on rank-choice answers. For example, the test averages your answers between "Feeling" and "Thinking," and if you are 51% "Thinking," you are marked with a T, with no explanation of the possibilities of other outcomes.
- For me, the flaw was very apparent. I had taken MBTI tests several times and had consistently received the result of INTJ, so much so that I would bring it up in conversations as a matter of certainty. This was all until I met Chase as part of an online mastermind with some of my closest friends.
- Chase noticed that I often mobilized my "introverted" friends, clearly placing me in the "extrovert" category within his model. During one of our first conversations, he confirmed to me that I was actually an *ESTP*, which struck me. I had never considered myself as a brash, risk-taking, alpha male who challenged everyone around me.
- After a lengthy discussion, his explanation made more and more sense. In fact, your personality type has 4 dimensions (the Ego, the Subconscious, the Unconscious, and the Superego). Our own perspectives of ourselves can easily fall into a different type than we actually are. Your Shadow can be very active during your teenage years, and that's when my perspective about myself had formed, and it had (incorrectly) stuck with me.
- A deep understanding of the model outlined in this book can give you an invaluable tool in your tool belt. No matter where you are, or what you do, you interact with *people*. Decoding people's inner thought structures is a timeless tradition that can be traced from early Greek philosophers, all the way to Carl Jung, until today. Chase has picked up the torch of this tradition and developed the model in new ways fit for the modern age (as well as smashed a bunch of misconceptions along the way).
- Use this book to think deeply about those around you, complete with their flaws, their high aspirations, and their demons. Above all, use it to understand *yourself*, and you might be surprised at what you find.

## What is the Type Grid?

# Learn how to easily identify yourself and anyone you encounter in life.

# INSTRUCTIONS

Sometimes the simplest things are the most difficult. This is true of the Type Grid as well. It is in effect an abacus or an array that unlocks the road map of human consciousness using a process of elimination.

On the following pages, please consider the description presented before attempting to judge your type.

The type grid is in effect a glorified multiplication table. This approach allows you to choose a row and column corresponding to a specific square to get a result.

In order to make the best use of the Type Grid, one must familiarize themselves with the definitions of all of its attributes then utilize them to navigate the grid. Such simplicity can make it hard to realize that it requires the patience to practice and to observe these things in themselves and others.

Doing so provides the user with the data necessary to compare and contrast behaviors in order to arrive at an accurate conclusion.

## How to **TYPE** Yourself **YOUR EXPRESSION**

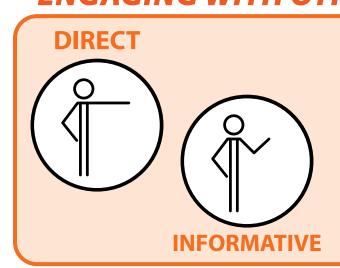

*"If we don't believe in free expression for people we despise, we don't believe in it at all."* – Noam Chomsky

## How are you interacting?

# Your expression style is your gateway to all human interaction and communication.

## **EXPRESSION STYLE BLUEPRINT** ENGAGING WITH OTHERS

**DIRECT** communication is explicit, specific, concise, or decisive. **Direct** leaves little doubt as to meaning or intent.

**INFORMATIVE** communication beats around the bush as it is implicit, descriptive, yielding, or vague.

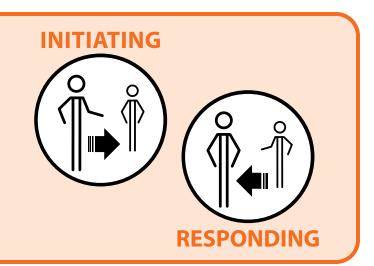

**Informative** leaves open the possibility for interpretation of meaning or intent. In conversation, **Direct** chooses roles, while **Informative** provides maximum information without taking a stand and allows the listener to decide roles.

## **STAYING IN THE LOOP**

**INITIATING** is a willingness to start or lead a conversation and to change topics at any time.

**RESPONDING** is a preference for a passive role in conversation and remaining on topic.

**Initiating** is taking the active role to get to know others, reinforce bonds, provide guidance, or keep lines of communication open. **Responding** is waiting for others to initiate and relying on others to keep them in the loop.

## **GETTING TO THE GOAL**

**OUTCOME** focus is deliberate, measured, and going at one's own pace to obtain the result the first time through, planning every step of the process.

**PROGRESSION** thrives in constantly moving toward the result, preferring faster or more attempts to the same end.

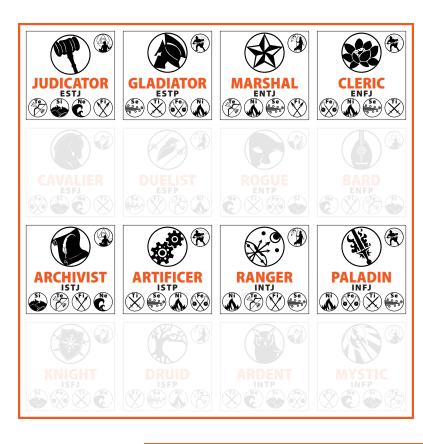

**Outcome** focus is planning and patient to optimize a single attempt for success. **Progression** focus is spontaneous and restless to find many attempts for success. **Outcome** fears unpredictability so attempts their objective with less frequency. **Progression** fears inaction so attempts their objective with more frequency. **Outcome** values the goal above the journey, progression values the journey above the goal.

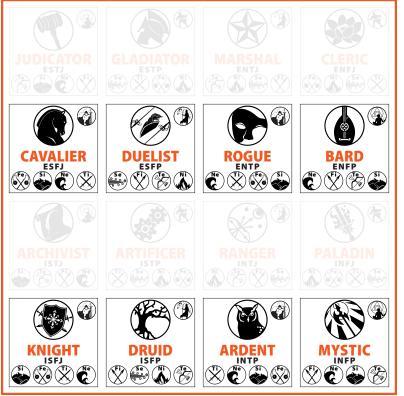

# DIRECTIVE CI INFORMATIVE

## How to **TYPE** Yourself **YOUR VOUR VOUR**

**"The most dangerous worldview is the worldview of those who have not viewed the world."** – Alexander Von Humboldt

## What is your point of view?

Guardians seek to bring oligarchy, Artisans seek to bring anarchy, Intellectuals seek to bring autocracy and Idealists seek to bring collectivism. Which will you bring?

## THE METHOD

<i>Listen to what people</i> <i>SAY/SPEAK:</i>		
Concrete	Abstract	
Things & Experiences	Ideas & Imaginings	
WHAT IS	WHAT IF	

#### **CONCRETE/ABSTRACT**

**Abstract** is a focus on intangibles such as concepts, implications, visualizations, and hidden meaning. **Concrete** is a focus on tangibles such as the physical world, experience, experimentation, and observation. Abstract perceives through impression and possibility. Concrete observes with the five senses of sight, sound, touch, taste, and smell. Abstract asks the question "What if?" Concrete asks the question "What is?" Abstract is hypothetical, theoretical, and idealistic. Concrete is proven, realistic, and down to earth.

2) Watch what people <b>DO</b> :		
Pragmatic	Affiliative	
What Gets Results	What is the Good or Proper Thing	
WHAT WORKS	WHAT'S RIGHT	

#### AFFILIATIVE/PRAGMATIC

Affiliative is focus on the proper, what "should" be, or "what's right" based on group standards. In contrast, **Pragmatic** is focus on individualism, effectiveness, and "what works" with less regard for standards or rules. Affiliative values cooperation within a family, group, or team: Pragmatic values independence and self-determination. Affiliative respects authority and proven methodologies. Pragmatic challenges authority and seeks new ways of doing things. Affiliative seeks permission before acting and is apologetic. Pragmatic seeks forgiveness after acting without permission.

**Systematic** is a preference for finding the absolute best process or method. **Interest** is a preference for insight into who benefits from the process or method. Systematic is objective and prefers predictable results, whereas Interest is subjective and prefers outcomes which can vary with situation. Systematic seeks the best method to achieve the outcome, while Interest seeks win-win or win-lose outcomes, provided they have the win.

# SPEAR&BOW CS SWORD&MACE

**DEFINITIONS** 

**Spear&Bow** judges and makes decisions based primarily upon rationale, aggregated knowledge obtained from external sources, and a personal sense of morality and goodness.

**Spear&Bow** values achievements and status from accumulated knowledge and skill to demonstrate its own intelligence and to verify that of others. It doubts its own reasoning, preferring instead to trust or believe what it learns from others.

**Spear&Bow** is also emotionally self-aware and seeks those things which make it happy, while minimizing or being unaware of this need in others.

**Sword&Mace** judges and decides based primarily upon logic, deductive reasoning, and the ethical standards of society at large.

**Sword&Mace** is confident in its own intelligence and ability to reason and doubts that of others. It seeks to make people better either in intellect or character. It also relies upon others to help inform its own morality and assuage feelings of self-doubt and lack of esteem.

**Sword&Mace** is less emotionally self-aware, instead seeking to care for or heal others for recognition or the chance to feed off their good emotions or values.

**INSTRUCTIONS:** Read the provided descriptions and consider how you relate to them. Most people usually act out one of each two options we provide more frequently than the other. All you must do is circle which option you believe you act out the most in your daily life.

### **IDENTIFY your preferred ARMAMENTS**

Refer to the **COGNITIVE ARMAMENTS**, (Page 26), as an aid for the exercises below:

**SWORD+MACE** decides primarily based upon deductive reasoning and the ethical standards of their adopted community. They value personal knowledge obtained from "If this, then that" reasoning and do not defer to external thinking unless they verify. This gives off an air of certainty in their thinking, especially when detecting contradictions in others. **Sword+Mace** rely upon others to provide recognition and soften feelings of guilt. Aware of how others feel; they seek to care, help, heal, or bring social harmony. **Sword+Mace** are at risk of ignorance when making decisions based on "last known input" or personal bias.

**SPEAR+BOW** decides based upon inductive reasoning and the moral standards of one's personal principles. They value aggregated knowledge obtained from statistics, data or credentials such as diplomas, certificates and other proof of skill. They defer to other's knowledge, preferring instead to curate external references. **Spear+Bow** are emotionally self-aware and seek the perception of status or credibility for the sake of increasing their value. **Spear+Bow** are at risk of ignorance when making decisions with unverified beliefs.

#### Circle: SWORD & MACE or SPEAR & BOW

**IMPORTANT:** If you circled **Sword & Mace**, you would be one of these eight types on the **TYPE GRID** (Page 6): **Gladiator, Cleric, Cavalier, Rogue, Artificer, Paladin, Knight, Ardent**. If you circled **Spear & Bow**, you would be one of these eight types on the **TYPE GRID** (Page 6): **Judicator, Marshal, Duelist, Bard, Archivist, Ranger, Druid, Mystic**.

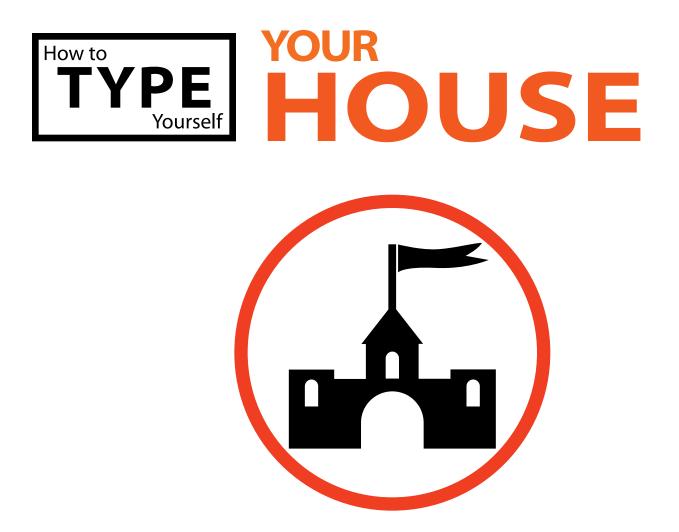

**WIND+FIRE** is a whirling awareness of the physical environment and how to manipulate it. Using the ability to create, build, and repair they exert willpower upon reality for the attainment of their desires. They prefer giving a sensory experience rather than receiving one. **Wind+Fire** needs personal freedom to make choices and to determine the course of its own life. Knowing other's actions helps determine what they want. It is also characterized by strong short-term memory and an awareness of one's own future.

**WATER+EARTH** is a flowing awareness of divergent possibilities and probabilities through other's desires and futures. They can see other's available choices and intentions in order to predict things before they happen. **Water+Earth** are creatures of habit, taking time to adjust behavior patterns or routines; potentially fearing the unfamiliar. They seek physical sensation or experiences. Willing to share stories from their experience, they help others in search of a similar outcome or to serve as a warning of danger. Strong long-term memory and an awareness of tradition contribute to duty, honor, safety, and personal comfort.

*"Family not only need to consist of merely those whom we share blood but also for those whom we'd give blood."* – Charles Dickens

## Ever had trouble finding your people?

At least a quarter of the world's population are so similar to you that you and them share the same struggles and triumphs on a daily basis.

# **THE FOUR HOUSES** Defined

## **CRUSADERS**

**CRUSADERS** are champions of fairness and protecting the innocent. They place their faith in truth and seek to bring about a just world. Crusaders seek to make others happy, yet have difficulty

accepting happiness for themselves. They must have adversity in life lest they think something is wrong. Crusaders see hardship as everpresent and to be endured.

## TEMPLARS

TEMPLARS seek to make people better. They are interested in others' well-being and strengthening their character. Templars require freedom to make their own choices and find their own

way in life. They teach, mentor, and counsel. They forgive and help people heal, yet they can also ghost people who refuse to take responsibility for themselves or who betray them.

#### PHILOSOPHERS

are studious and academic. Faith, belief, ideas, and prestige are all important. They are drawn to civic duty, charity, and politics. Philosophers live their lives committed to doing the right thing. They also seek to create rules and guidelines for others to follow. They are focused on their own happiness and comfort over that of others.

## **PHILOSOPHERS**

WAYFARERS are independent, realistic, and objective. They challenge rules and like to find better ways of doing things. Wayfarers need freedom to live life how they want. They are self-assured and competitive. They seek esteem and

loyalty, but doubt others' ability to give it. They tend to be suspicious.

## YOUR HOUSE Worksheet

**INSTRUCTIONS:** Read the provided descriptions and consider how you relate to them. Most people usually act out one of these options we provide more frequently than the others. All you must do is circle which option you believe you act out the most in your daily life.

### **IDENTIFY your preferred HOUSE**

Refer to the **QUADRA FOURSQUARE**, (Page 33), as an aid for the exercise below:

**CRUSADERS** are dutiful champions of fairness and protecting the innocent. They place their faith in truth and seek to bring about a just world. **Crusaders** seek to make others happy yet have difficulty accepting happiness for themselves. Through adversity they obtain happiness. **Crusaders** see hardship as something to persevere through and wield high endurance but are at risk of bitterness or being too cold when dealing out justice. **Crusaders** are at risk of hypocrisy by finding the innocent guilty and can become a source of injustice.

**TEMPLARS** seek people of character or build character in those who lack it. They are interested in strengthening the well-being and character of others. **Templars** require freedom to make their own choices and find their own way in life. They teach, mentor, and counsel. They forgive and help people heal, ghosting traitors or people who refuse to take responsibility for themselves. **Templars** are at risk of hypocrisy when criticizing others for being irresponsible, while being irresponsible themselves.

**WAYFARERS** are independent, realistic, and matter of fact. They challenge the status quo in favor of finding a better way. **Wayfarers** require freedom to pursue their own interests and way of life. They are self-assured and express themselves through personal performance, often competitively. They seek admiration and loyalty, but doubt others' ability to provide it. Their purpose is to pursue treasure and the status it brings, choosing with whom they share it. **Wayfarers** are at risk of stealing treasure, rather than earning it for themselves.

**PHILOSOPHERS** are academically inclined to discover secrets to success. They craft a world view to share belief, ideology, and reputation. **Philosophers** are drawn to civic duty, volunteering, and politics to strengthen their voice. Through enduring hardships, **Philosophers** establish rules and guidelines they believe are righteous. They attend to their own happiness and comfort yet can be inattentive to that of others. **Philosophers** are at risk of sacrificing fellow human beings for the sake of their own success, instead of success gained through self-sacrifice.

## ACKNOWLEDGMENTS

I would like to take the time to acknowledge the following people for making such a document and ultimately, such a science possible. Each of them have contributed to this project in some manner and I am thankful that we now can utilize it for the sake of benefiting mankind on a massive scale in which we haven't seen since the time of Carl Gustav Jung. Therefore, I would like to say thanks by listing each of their names and their specific contribution.

- **Plato**, author of "Plato's Republic." And for providing our initial understanding of the four temperaments also known as "Worldview" as portrayed in this document.
- **Isabel Briggs Myers**, for bringing out Myers-Briggs Type Indicator as an alternative interpretation of C.G. Jung's work where I first began my journey into the science when I was 21 years of age, attempting to save my marriage.
- **Dr. David Keirsey**, author of "Please Understand Me II: Temperament, Character, Intelligence" and for first bridging the gap between MBTI and Plato.
- **Stephen Montgomery, PH.D.** author of "People Patterns" and for his interpretations of the four temperaments that contribute to the "Worldview" section of this document. Thank you sir for sharing your observations.
- **Dr. Linda Berens**, author of "Understanding Yourself and Others: An Introduction to Interaction Styles 2.0" and "Understanding Yourself and Others: An Introduction to the 4 Temperaments-4.0." While I recognize we have had conflict with our interpretations of the science, I cannot deny that you have been absolutely pivotal and foundational in making the Type Grid possible. You are without a doubt one of the most important pillars of this science and I am most grateful for your work. This document would not exist without you.
- **Dr. Dario Nardi**, author of "The Neuroscience of Personality" and for his work in building a bridge between this form of psychology and empiricism such that we will have irrefutable evidence this science is as concrete as physics. Thank you also for your oversight and guidance.
- **Dr. John Beebe**, for his outstanding work in his Magnum Opus: "Energies and Patterns of Psychological Type" and for doing me the honor of considering me a colleague. None of this was possible without you.
- **Dr. Carl Gustav Jung**, author of "Psychological Types" and "Aion", for the foundation of the types, functions, and the four sides of the mind.
- **Robert Bryant**, for introducing me to the Type Grid. I promise I will keep it open source as you have required of me since first giving it to me during my homelessness.
- **Robert Moriel**, for teaching me how to interpret the Type Grid dichotomies and providing the initial building blocks behind the demonic inverse that led to my understanding of the four sides of the mind. Furthermore, I would not be the man I am today without you destroying my worldview and paradigm then building me back up in the process. I am grateful to you the most out of everyone on this list.
